Art Unit: 1624

R^1 and R^2 form a bridge;
E is piperazinyl (or $q = 1$); G is G^4 ,

and their preparation, composition and methods of treatment, classified in class 514, subclass 253.01, and class 544, subclass 360.

XVIII. Claims 2, 8, 12, 14, 24, and 32-50 (part of each), drawn to compounds of formula

I with the following substituents:

R^1 and R^2 form a bridge;
E is piperazinyl (or $q = 1$); G is G^5 ,

and their preparation, composition and methods of treatment, classified in class 514, subclass 253.01, and class 544, subclass 360.

XIX. Claims 2, 8, 12, 14, 24, and 32-50 (part of each), drawn to the remaining

compounds of formula I (not included in the above groups, e.g., $q = 2$ or 3, etc.),

and their preparation, composition and methods of treatment, classified in various classes, and subclasses.

The inventions are distinct, each from the other because of the following reasons:

Inventions of groups I through XIX are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions represented by the compounds of each group can be used independently, and are not combination/subcombination of each other.

Art Unit: 1624

Although the compounds of groups I-XIX share a pyridyl (or pyridyl-N-oxide) ring, the combination of substituents R¹, R², A, E, and G sets each group apart. A search on a mere substituted pyridyl or pyridyl-N-oxide ring would yield an exorbitant number of hits. Thus, a burden of searching exists even though groups I-XVIII share the same class and subclass.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
